

Act Now and Get a One Year Express Warranty!

As an added incentive, if you order the A106.5 callbox by June 30, 2004, you will be given an upgraded One Year Express Warranty! Connectivity's team is so confident about the quality and workmanship of our products that we can easily offer this upgrade at no additional cost to you.

If at any time during the 12 months (from the time of

delivery) you experience a problem that our technicians can not quickly troubleshoot over the phone, you can simply ship the system back to Connectivity in its original packaging, and we will repair or replace the system and ship it back to you **within 24 hours of our receiving the**

unit. Your only responsibility is to pay the freight back to our factory, and to use reasonable care when repackaging the system to protect electronic parts during shipment.

“Ben call the proshop, that was my last ball!”

Just a Few of our Satisfied Customers

“I would like to extend my thanks to Connectivity, Inc., and their SafeTee callbox for increasing the volume of Food & Beverage sales over the past five years. We noticed an immediate increase in Food and Beverage orders of up to 20 per day and our members have become accustomed to placing orders during their round. I highly recommend the Connectivity callbox to any establishment and would be happy to be a point of reference for any golf course Food and Beverage manager. We are now considering adding additional boxes as a safety measure for the furthest points away from our clubhouse.”

Port Malabar Country Club, Mr. Peter Pepe, Owner

“Thanks to Connectivity, Inc., and especially Derek Anderson. At Brookhill Golf Course we have used the wireless callbox on the 9th and 18th tees to increase our Food and Beverage orders over the past two years. We have definitely noticed an increase in quality Food and Beverage orders, all without slowing down our golfers play. In addition, Connectivity's follow-up service has been tremendous!”

Brookhill Country Club, Mr. Bill Anderson, Manager

“Over the last 5 years we have added 2-4 callboxes per year for emergencies on our golf course and tennis courts. We now have over 12 units on our property! On a daily basis our security personnel make the rounds and call in from every callbox. We have felt that once we purchased our callboxes we had to implement a procedure to respond to them in an emergency. In doing so, we are constantly reminded by our property owners that since the callboxes were installed, they feel that at any point on the property they can have security personnel at any location within minutes.”

Boca Polo Golf and Tennis Club, Mr. Edward Rodriguez, Director of Security

“It has been approximately 2 years since we implemented the SafeTee callbox on Scotland Run Golf Club. Being a fairly new facility we wanted to devise a way to keep not only the pace of play moving quickly, but keep the Food and Beverage orders on a consistent upward level. Our members and guests have enjoyed using the callbox, for the one button operation makes it easy to place orders.”

Scotland Run Golf Club, Mr. John Igoe, General Manager

“...we are constantly reminded by our property owners that since the callboxes were installed they feel that at any point on the property they can have security personnel at any location within minutes.”

Connectivity, Inc. is part of the CNE Group, Inc. companies; including SRC Technologies, Mobile Communications, Inc. and US Commlink, LTD. Through the experience, technical expertise and relationships of these companies, Connectivity is able to offer your organization standard or customized communications solutions. Our technologies are built around patented or proprietary technologies that have enabled integration with the equipment of many of the largest companies in the wireless industry. Our group of companies has designed, manufactured, installed and maintained remote response equipment for state and local governments, military, and public and private institutions. Feel confident that our solar or traditionally powered communications devices and software have been designed with future technological development and your budget limitations in mind.

Heading to Las Vegas for business or pleasure...check out the Nevada Department of Transportation's new highway safety initiative...look for Connectivity's MACPLUS highway callboxes between Las Vegas and the California border along Interstate 15. Instant access to Highway Patrol, gas and auto technicians, towing companies and paramedics! To further enhance this initiative, Connectivity's wireless video systems will be installed in the next few months!

Refer Your Way to a Free Callbox!

Connectivity's Referral Program is being extended to all golf course organizations. Any golf course referral sent to Connectivity by an employee of your establishment, where at least one call box system is purchased from Connectivity, Inc., will automatically enter your club into a free callbox giveaway. The club with the most callbox referrals that lead to purchases by September 30, 2004, will receive an A106.5 callbox **free of charge!**
